

3G/4G Outdoor Mobile Cloud Surveillance System

Outdoor mobile surveillance system help you to solve the monitoring system could not move according to the progress of the construction process!

Really go to the progress of the project

~ where to move reach ~ where to video record

~ where to monitor watch ~ where to management ~

3G/4G Outdoor Mobile Cloud Surveillance System

- Full rental mode, access to fast and convenient, maintenance no burden
- Outdoor DC UPS can be used for more than 12 hours
- Free network, using 3G / 4G wireless Internet access
- 720P million pixel resolution
- Portable three-legged bracket for easy movement and height adjustment
- Through the smartphone or computer Internet access can be immediately monitored and playback
- Cloud loop video with live playback for up to 30 days
- SD card backup video and backup to fill the image to the cloud function
- Images can be shared at the same time

3G/4G Outdoor Mobile Cloud Surveillance System

Outdoors 3G/4G wireless cloud surveillance & temporary mobile surveillance system

『Real Outdoor Waterproof, Resistant to High Temperature 70 °C, Life Cycle more than 6 Years and Outdoor DC UPS Support Power Supply over 12Hrs - 130Hrs.』

Should for "Fire site emergency ", "Emergency accident temporary ", " Illegal to deliver garbage", " Forest stealing the timber ", "Temporary activities ", "Construction site ", " Marathon road race activity "...and so on, to do mobile video record and cloud real time monitoring.

Integration Special Features:

■ Cloud Network IR Camera

- Support 1.3 Mega Pixels network Camera and 20-meter infrared effect at night.
- Design of VPN network, simply enter your account number and password in advance online, without making any setting, you can make a cloud video monitoring and network real time monitor.
- If connected to the Internet network can perform remote control setting on a cloud.
- Site backups can used with NVR video recording, also can be used with NAS backend video management.

■ The Cloud of Network Monitoring Platform Run Recording and Playback Features

- Only need connected to the Internet network, cloud platform will automatically perform the cloud video in real time.
- Only need connected to the Internet network, you can watch real-time video recording images from cloud platforms.
- Only need connected to the Internet network, you can remote control and playback video recording images from cloud

3G/4G Outdoor Mobile Cloud Surveillance System

platforms.

- The cloud record video type can select 7-day or 30-day cycle, covers the video replays and download access to your files.

■ Outdoor 3G/4G Wireless Router

- 3G/4G wireless, mobility and wireless advantage does not subject to space restrictions, particularly suitable for monitoring emergency and temporary needs.
- 3G wireless bandwidth up to 2Mbps, 4G the wireless bandwidth up to 8~18Mbps, can handle single or multiple cameras transmission needs.
- 3G/4G wireless router transfers, only need 3G/4G SIM card is inserted, without making any setting can online transferred right away.

■ Outdoor Long-term DC UPS Power Supply System

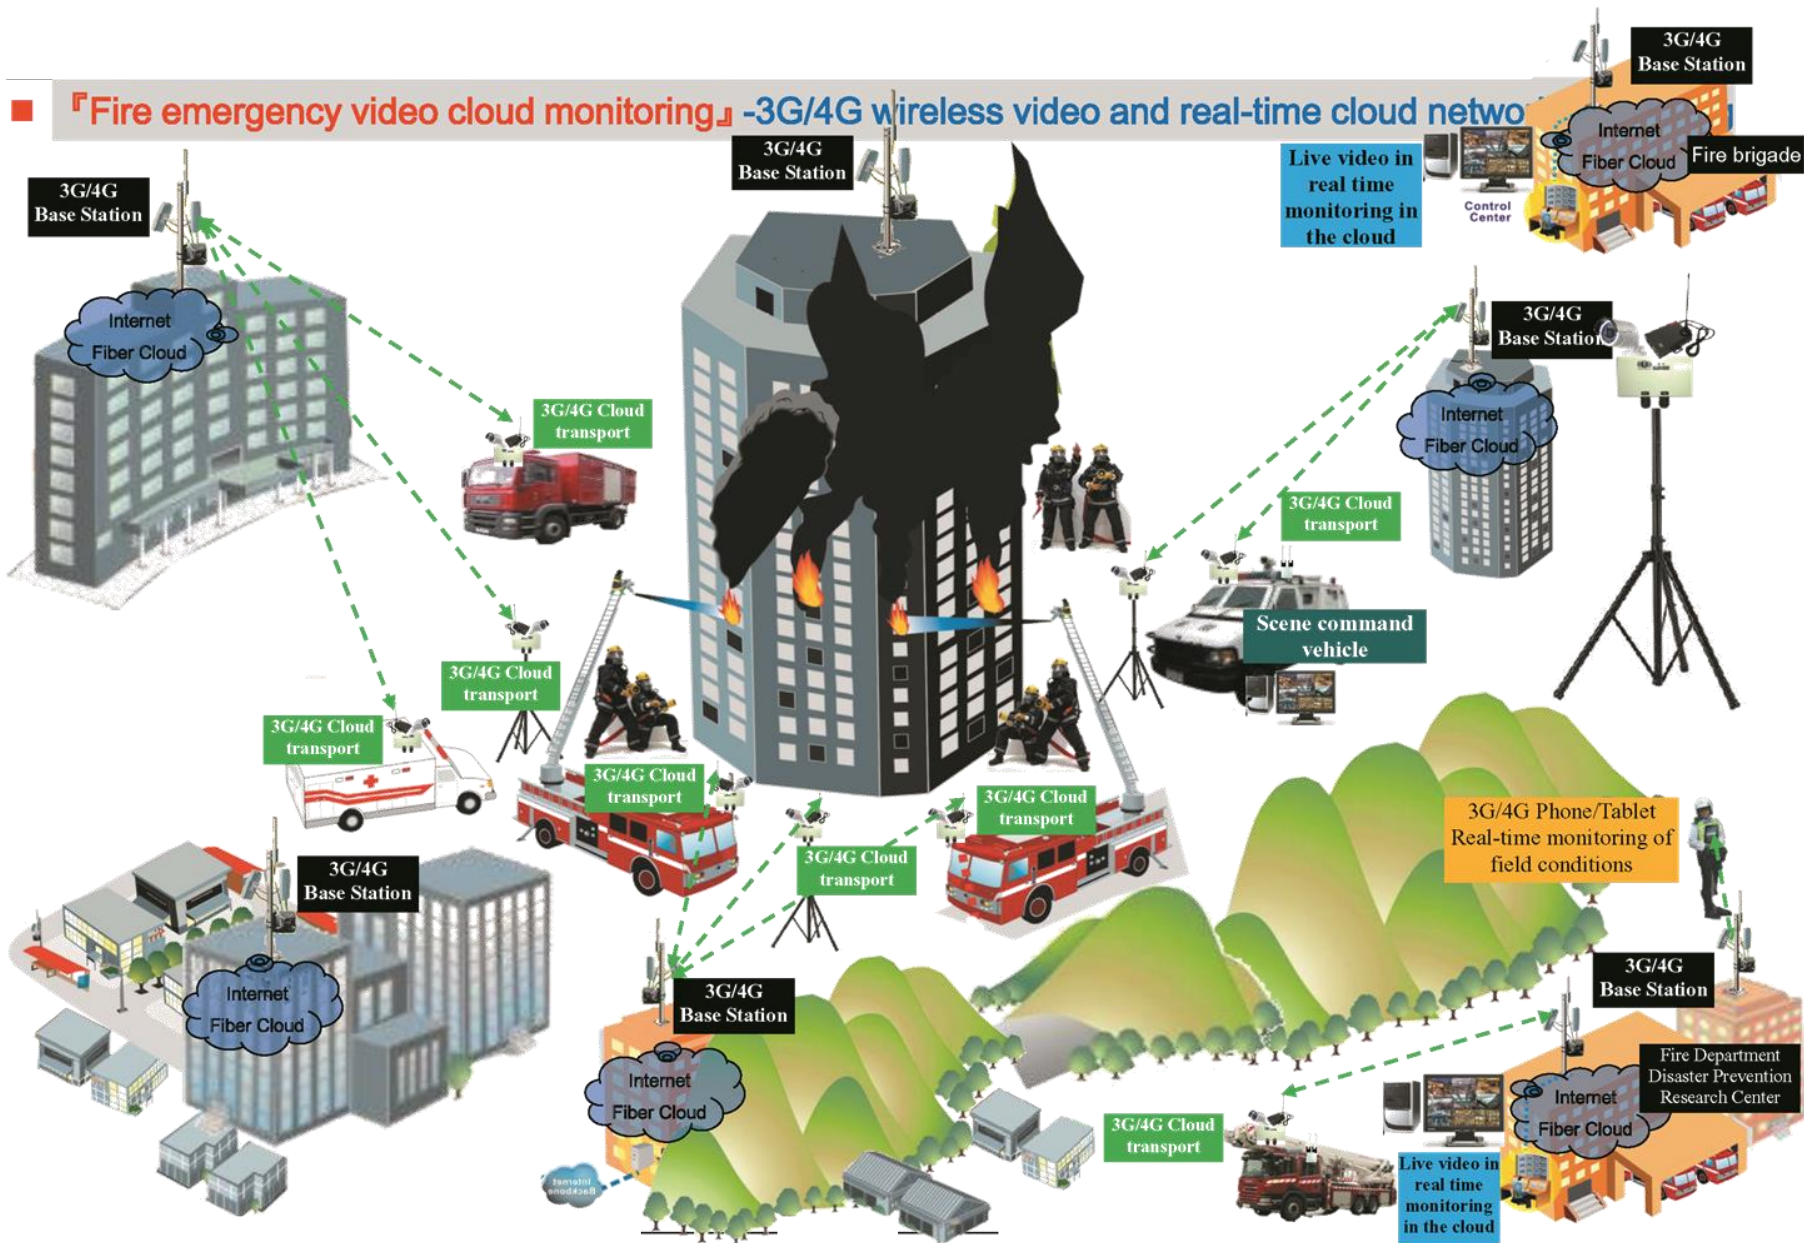

- Power supply system with IP66 outdoor environment with 70°C heat-resistant normal operation of more than 6 years of service life.
- Support for 12 hrs ~ 130 hrs outdoor power supply system (or connect online backup DC UPS to place an unlimited number of days), (based on the 3G/4G wireless video monitoring system in the cloud power calculations)
- Use large power consumption DC UPS type can supports eight cameras working at same time and large current fast-charge available in a short time (2-10 hours) full battery.

■ Magnet Match-Assembly Equipment and Easy Storage Tripod

- Portable mobility combined with the magnet change and free features such as adsorption of metal fixation, suitable for use in an emergency

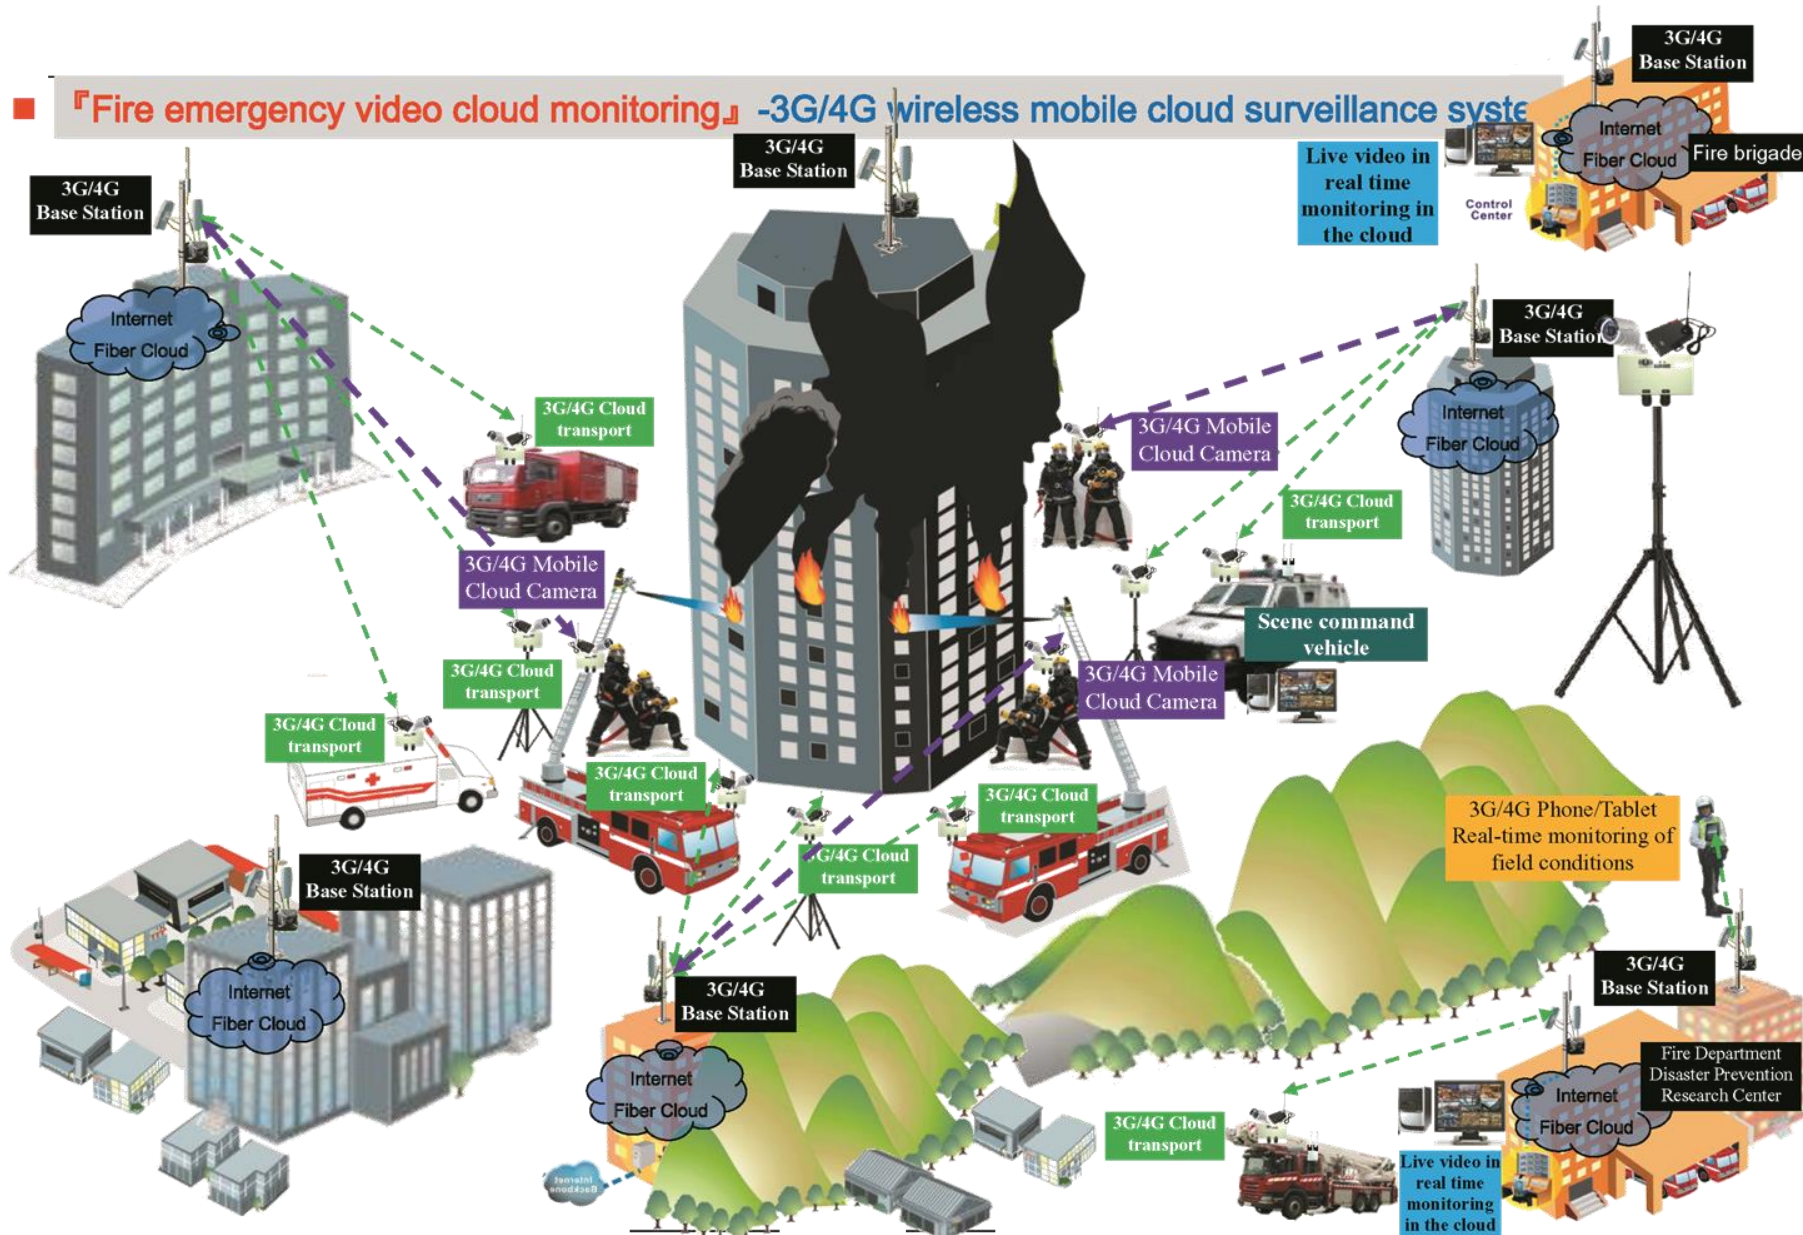

3G/4G Outdoor Mobile Cloud Surveillance System

■ 『Fire emergency video cloud monitoring』 -3G/4G wireless video and real-time cloud network

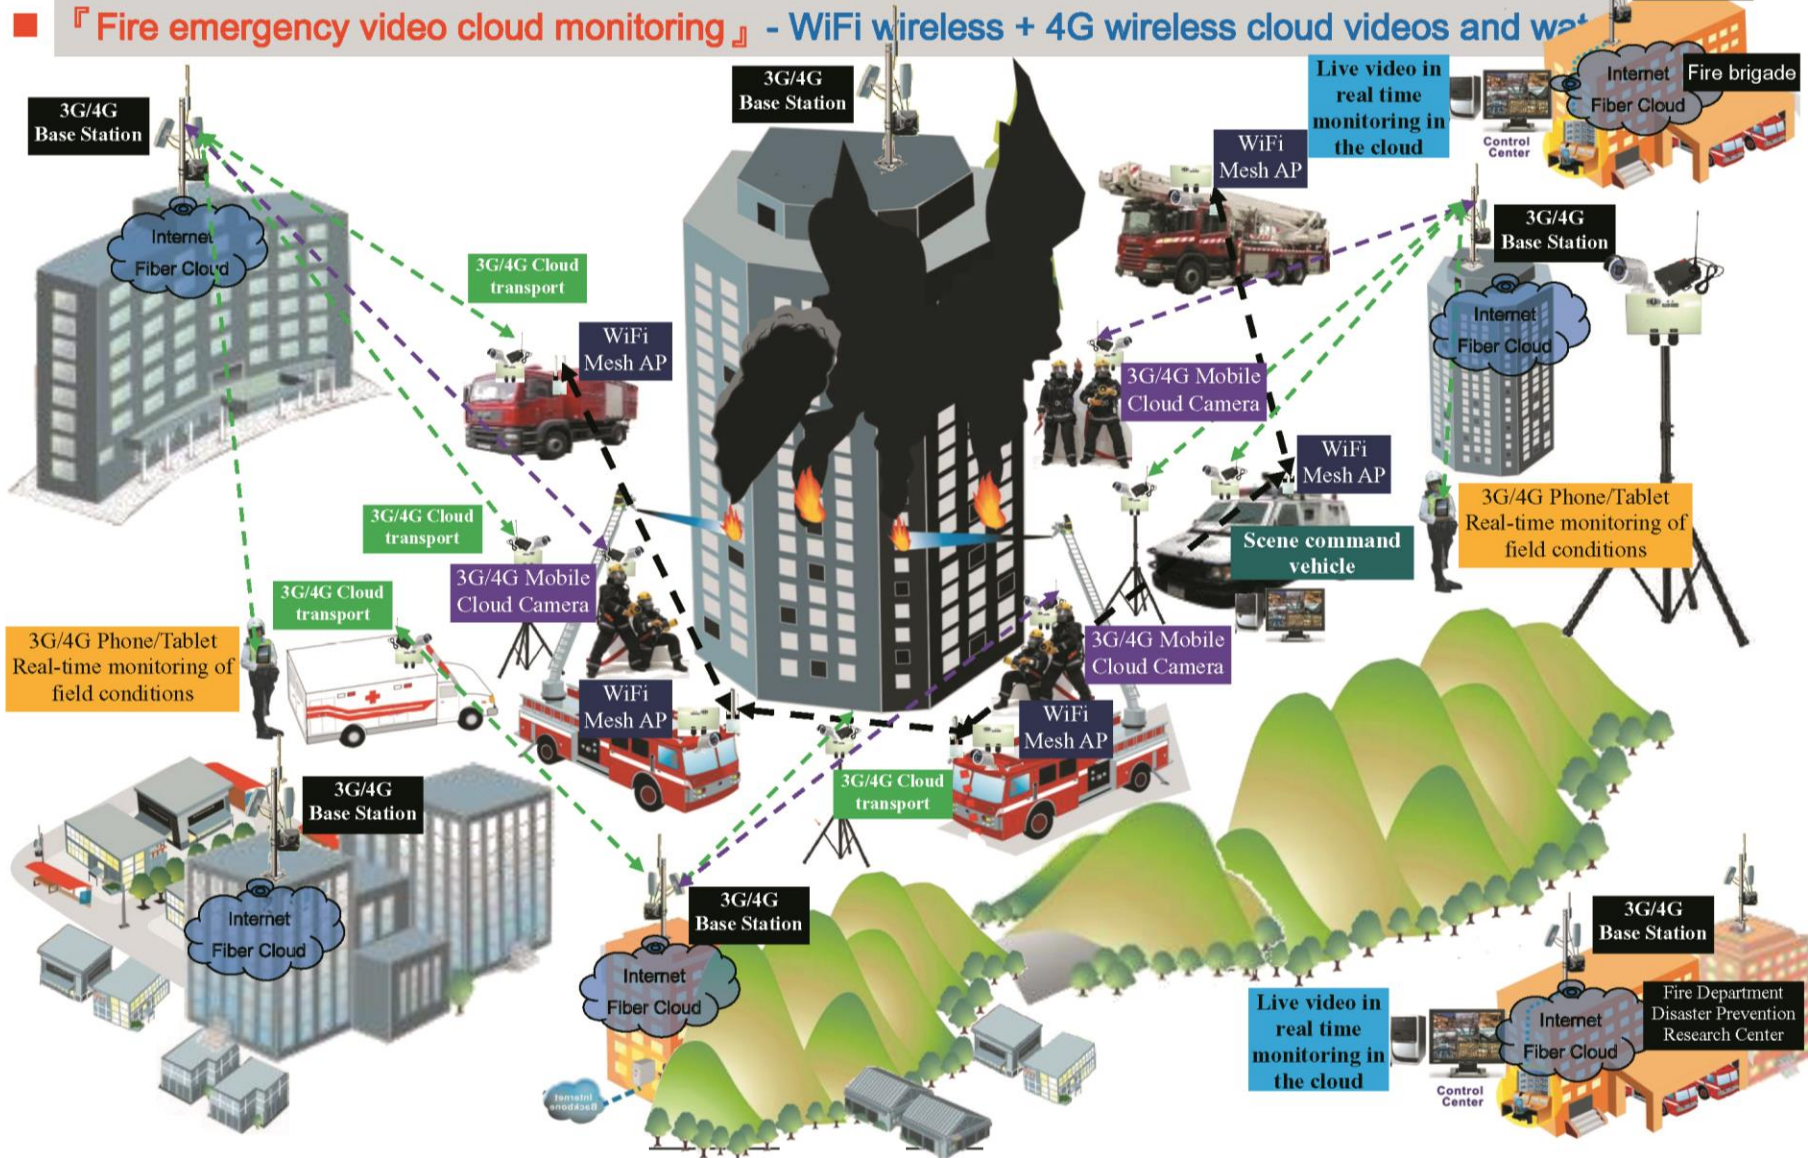

3G/4G Outdoor Mobile Cloud Surveillance System

■ 『Fire emergency video cloud monitoring』 -3G/4G wireless mobile cloud surveillance system

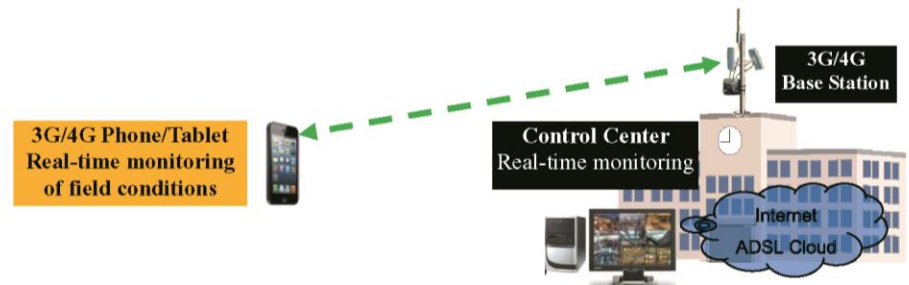

3G/4G Outdoor Mobile Cloud Surveillance System

3G/4G Outdoor Mobile Cloud Surveillance System

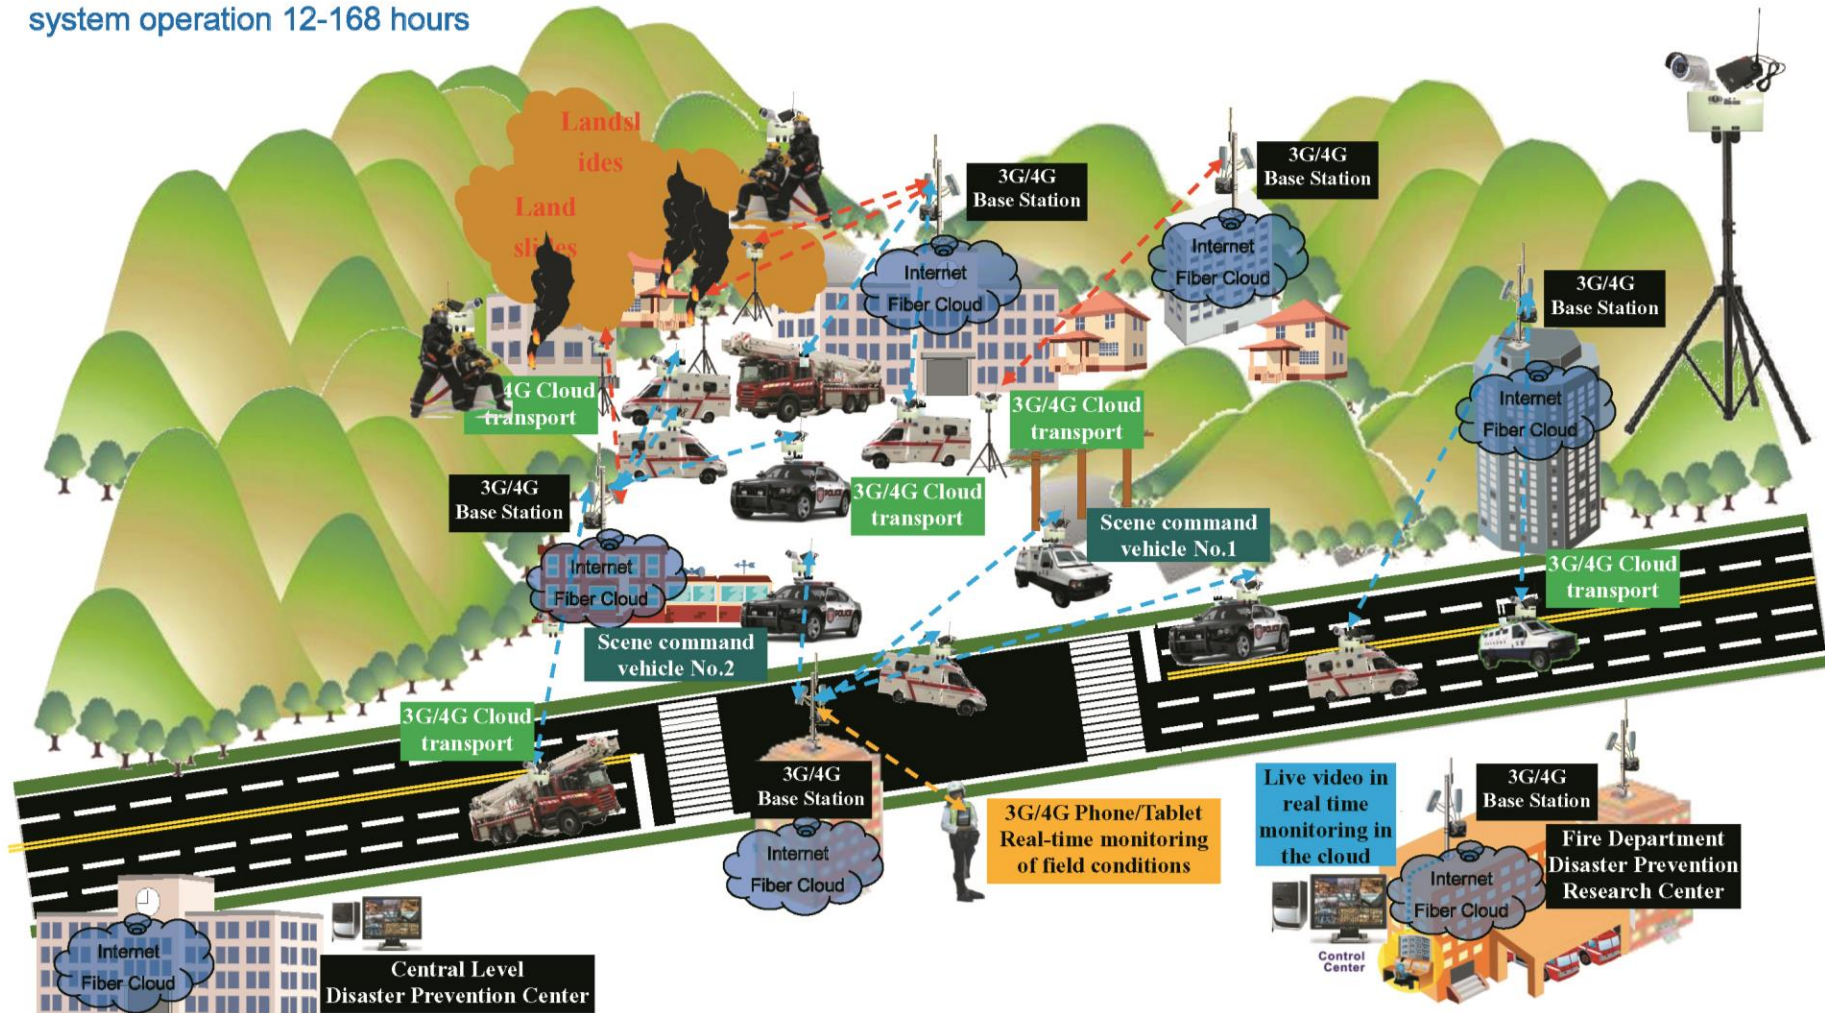

- 『Illegal to deliver garbage』 - Use 3G/4G wireless mobile cloud surveillance system

3G/4G Outdoor Mobile Cloud Surveillance System

■ 『Emergency accident temporary』 -3G/4G wireless video and real-time cloud network monitoring

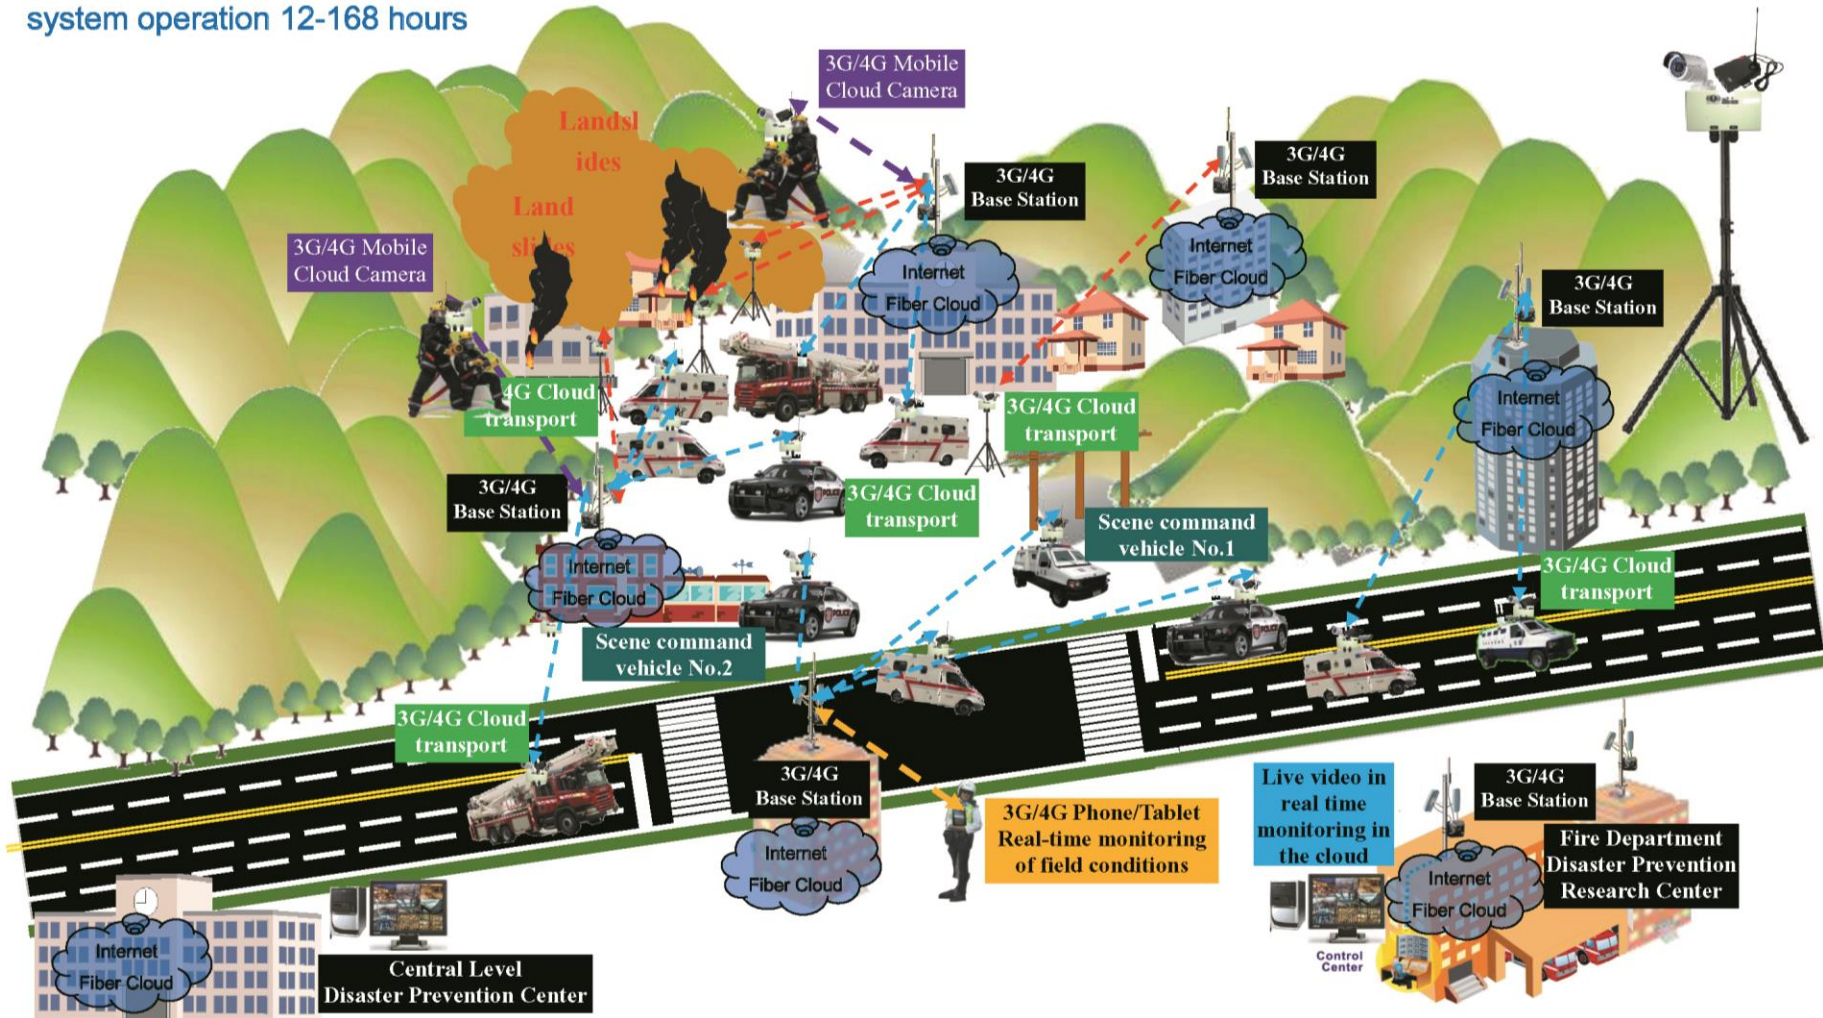

Images transmitted via 3G/4G wireless real-time disaster situation, with outdoor long-term type power supply DC UPS system operation 12-168 hours

3G/4G Outdoor Mobile Cloud Surveillance System

■ 『Emergency accident temporary』 -3G/4G wireless mobile cloud surveillance system

Images transmitted via 3G/4G wireless real-time disaster situation, with outdoor long-term type power supply DC UPS system operation 12-168 hours

3G/4G Outdoor Mobile Cloud Surveillance System

■ 『Construction site』 -3G/4G wireless video and real-time cloud network monitoring

Images transmitted via 3G/4G wireless real-time disaster situation, with outdoor long-term type power supply DC UPS

system operation 12-168 hours
